Jan 12th 2016

Dear Colleagues,

In our discussions with commissioners and providers it has become apparent that there is a need for FPH to be better informed of the skills, expertise and qualifications of the clinical staff in our shareholder practices.

This knowledge will mean that we are better placed to bid for certain contracts and plan our work.

Providing this information is not a commitment to any work, but may mean FPH can approach individuals or practices with the necessary expertise when we are considering certain services.

Please assist us by completing the table below with details of any additional skills, expertise or qualifications (we are not asking for detailed CVs but basic details. e.g Dr F Smith ...FRCS, Dip OCC, 5years experience as Occupational Health Physician).

It would also assist us to have an idea of the potential availability of GPs for any general medical type work above and beyond your usual practice commitments (we know you might not want more work but you might need more income). Please indicate this availability for each GP within your practice (partner or salaried) and consider, for the purpose of this survey, that remuneration would be at a premium rate.

On behalf of FPH Board
