Overall View of Course			2	7		57
Would you recommend this course to colleagues?	Yes: 60	No: 0	Not Answered: 6			
How will your practice change as a result of completing the course?						
Gave some good tips for foot care						
Some practical, practice on each other						
Improved my knowledge which I will take to work and use						
A greater understanding of what to look for with peoples feet						
Will try to take a more indepth look at foot check to get more information in allotted time to improve patient outcome						
I will be able to educate my patients to be more cautious with their foot care						
I have gained a better understanding and knowledge to pass on to my patients						
Add practical element, more time with Beverley Bostock- lifestyle and diet						
Identifying foot ulcers/neuropathy						
I will be more aware of potential foot problems when doing foot examinations						
Now more aware of accurate foot checks importance						
Enhanced knowledge of examining the foot in a diabetic						
Buy some more monofilaments! Give patient information prescription						
Confident and able to assess, educate and manage diabetic feet						
I have more knowledge now around foot assessment						
Excellent talk by Beverley Bostock, very informative						
Educate patients, confidence to complete foot checks						
Up to date information						
More aware about what to look for during assessment and education for patients						
Will check the foot more carefully						
Got reception to send out reminders for diabetic patients who are non attenders						
Developing more efficient clinics including my HCA to assist clinicians						
Better informed of when to highlight and escalate a person to the referral systems in place. Education is key and the importance of offload and the key of clinical assessment as opposed to						
Aware of when and where to make referrals in the need of the patients wellbeing						
Certainly on referring more patients						
Better knowledge of assessment of diabetic foot and what to look for as well as pulses and monofilament testing						
Will be paying more attention to working beyond glycaemic control						
Enhance education for patients, act on early signs, obtain doppler for pulses that are unable to be felt						
Improved knowledge and undertake an annual foot assessment. Better understanding of risk factors to try and reduce wound/ulcer risk						
I can educate patients on their foot care and explain the importance of basic foot care reduce health risks						
Made me more aware of drugs used in diabetic care. Check patients joints for problems even though other nurses may be doing it						
It has been very valuable in reminding my practice of all the elements that need to be considered for a patient presenting with a foot wound.						
This is good as out of hours district nurse we get called into all sorts of things and might stumble across all sorts of things						
More recognition in diabetic footcare						
Would have been ideal if monofilaments were provided						
Use more monofilament sites, look at information prescription for footcare on diabetes UK						
Ensure that all patients are followed up on a regular basis or opportunistically						
Will put into practice at surgery with updated information and knowledgeable giving more opportunity to get patients to comply with their care						
<i>Review and arrange purchase of new monofilaments. Download touch the toes test-diabetes UK. Look up Montgomery ruling</i>						
<i>More knowledge, confidence to give the knowledge to patients</i>						
<i>Keep doing the footcare and know it's importance</i>						
<i>Good refresher. More enthusiastic in health promotion for prevention</i>						
<i>Just general update of performing diabetic foot examinations-ensuring not missing anything</i>						
Additional comments:						
<i>Good and knowledgeable</i>						
<i>Excellent</i>						
<i>Great venue, easy access</i>						
<i>I would have liked to be provided with a monofilament as this is a diabetes course, freebies promotion goes a long way</i>						
<i>Bev was brilliant</i>						
<i>Slides 2005/2005 - outdated info. 2002 first presentation</i>						
<i>Well presented, interesting powerpoint slides and photos. Very enjoyable</i>						
<i>Would like information to give to patients. Thanks for the tea and food!!</i>						
<i>Best venue I have been to, tutors were informative. Just right, excellent, found it very interesting</i>						
<i>Maybe more time spent on foot examination. It would be helpful to have referral pathways per locality and referral form review</i>						
<i>sending letters out to non attenders in diabetic review. The best time would probably be at flu session give blood forms out</i>						
<i>Excellent course</i>						
<i>Excellent study session delivered by expert speakers</i>						
<i>Very Informative</i>						
<i>Excellent course</i>						
<i>Speakers were extremely knowledgeable with information and training. High standard, presented well</i>						
<i>Good refresher</i>						
<i>Would like a follow up with further sessions on diabetes management-drugs etc</i>						
<i>Interesting speakers very engaging-last speaker needed longer</i>						
<i>Thoroughly enjoyed this thank you</i>						
<i>Recommend this for Health Care Assistants</i>						
<i>Check for painful neuropathy, download nice 'putting feet first', advise footwear, improve pt education and written information, information prescription diabetes UK</i>						
<i>Check monofilaments and change 10g</i>						
<i>Not all practice nurses are prescribing and last section was slightly intense. Must state though that all the speakers were excellent thank you</i>						
<i>2nd lecturer - negative comments about nurses assessments and podiatry. Not everyone is neglectful, some of us have pride in providing high standard of service to our patients. Overall content good</i>						
<i>1st lecturer -5</i>						
<i>2nd lecturer - patronising</i>						
<i>3rd lecturer - 5</i>						
<i>Usually just use doppler to assess pulses as do not seem to have good sensation in my own fingers to identify/palpate foot pulses. Will try to practice more with palpating. Need to be made aware of phasic sounds</i>						
<i>Informative-detailed and enjoyable</i>						
<i>Course didn't run to time-always frustrating</i>						
<i>first 2 speakers content very similar therefore went on too long, 3rd speaker should have had more time</i>
